

Final
Philosophy mid term questions (all ponies I could get my hands on)

1. If a principle is true in the perceptible realm, then its true in the imperceptible realm.
TRUE
2. Understanding the significance of the imperceptible realm:
UNDERScores THE IMPORTANCE OF CHIROPRACTIC CARE IN MAINTAINING THE WELL-BEING OF THE ENTIRE INDIVIDUAL.
3. Vitalism is a philosophical doctrine that :
LIFE IS SOMEWHAT SELF-DETERMINING AND NOT ALWAYS EXPLICABLE BY LAWS OF PHYSICS AND CHEMISTRY
4. "Gnosis" is knowledge that is above mere assimilation of facts:
False
5. "Head knowledge" is a term which denotes the "left lobe" ~~of the brain~~ and the term "kardia" refers to the "heart knowledge" or the right lobe of the brain
TRUE
6. "Inductive Reasoning: describes the basis of explaining ~~chiropractic~~ philosophy.
FALSE
7. The primary difference between empiricism and rationalization is that empiricism is based on a strong philosophical basis of our perceptions.
FALSE
8. Faith is a viable form of perception that is more applicable to intellectual concepts other than chiropractic:
TRUE
9. Rationalization is the most common form of perception utilizes in chiropractic philosophy.
TRUE
10. The major premise in chiropractic philosophy relates to all of the following concepts except:
INNATE INTELLIGENCE
11. Universal intelligence is related to intelligence at the atomic level and functions in accord with natural laws:
TRUE
12. A Chiropractor's 'adjusting Technique' determines the manner of his/her practice more than any other factor.
FALSE
13. Deductive reasoning is different from inductive reasoning because deductive reasoning:
begins with a generality and moves to a particular
14. Osteopathic's philosophy and principles during its initial development were based primarily on:
Abnormal spine alignment and its effect on circulation or body fluids
15. R. I. Palmer taught that order and organization bespeaks intelligence, both at the atomic level and →

15(cont.)
cellular level.

16. Innate Intelligence would be associated with: YOUR BEATING HEART (living material)
17. Fundamental criticisms of the practice of orthodox medicine, by chiropractors, as well as medics include all but one of the following:
FOCUSES TOO MUCH ON STRENGTHENING THE RECUPERATIVE POWERS OF THE BODY AND IMPROVING THE RESISTANCE OF THE HOST.
18. Which one of the following contributed the least to chiropractic's initial or early development:
PHARMACEUTICAL INDUSTRY'S CONDEMNATION OF CHIROPRACTIC THERAPY
19. "Bonesetting" became identified and stereotyped in the early 1900's as:
A LOW-LEVEL UNEDUCATED PEASANT'S TRADITION OF HEALTH CARE AND FOLK PRACTICES.
20. The most serious challenge to orthodox medicine was homeopathy patients preferred homeopathy over medicine because:
homeopaths did less harm to their patients with their treatments
21. Homeopathy's past history is significant to today's chiropractic profession in that:
FULL ACCEPTANCE OF HOMEOPATHY BY THE MEDICAL PROFESSION AND CONTRIBUTED TO THE EVENTUAL DECLINE
22. Deductive reasoning does not specifically have the following characteristic.
BEGINS WITH PARTICULAR AND MOVES TO GENERALITY
23. Innate intelligence and universal intelligence differ in that:
THE BOTH ORGANIZE LIVING MATTER "ACTIVELY"
24. The intent of early osteopathic technique did not include the following objective:
reduces subluxation and nerve pressure
25. Efferent pathways of the nervous system:
from brain to tissue cells
26. Life is where intelligence and force meet:
false
27. Life is a triunity of intelligence, force, and matter.
True
28. For 100% of life there must be 100% intelligence, 100% force, and 100 % matter.
True
29. Matter requires attention of intelligence to exist.
True
30. The job of intelligence is to create force. True
31. The forces of the universal intelligence are manifested as physical laws and are constructive.
False... not constructive destructive
32. Transmissions of universal forces can be interfered with?
True or false ?????

33. When two elements of a joint have been displaced, but to a degree less than actual dislocation it is...

functional joint defect

34. Daniel Palmer was the father of:

B. J. Palmer

35. In examining a suspect joint, by radiography, palpation, or by other means the chiropractor is looking primarily for some abnormality in:

structure

36. The term for a radiograph taken while the patient is standing upright is:

??????

37. An abnormal excess of movement in a joint is termed:

hypermobility

38. The developer of chiropractic was:

Bartlett Joshua Palmer

39. Chiropractic was defined by , B.J. Palmer as "philosophy science, and art." Chiropractic Philosophy deals primarily with:

universal and innate intelligence and its relationship to the homeostasis of the body

40. Cancer cells show all of the following characteristics except one of the following:

they function and care about the other cancer cells and organs in which they reside

41. Innate intelligence creates innate forces which are expressed as neural impulses:

True

42. Both universal intelligence and innate intelligence are found in matter, simultaneously.

False

43. A Philosophical definition of death would best be defined as:

when innate intelligence can no longer adapt the body to the environment

44. There have been ____ formal government inquiries into the efficacy of chiropractic worldwide during the past 20 years:

6

45. Nerve growth constituents are mobilized by:

AXT

46. The most thorough formal government inquiry into chiropractic worldwide during the past 20 years was the:

New Zealand Inquiry

47. The hypothesis that suggests that the affects of the hypomobility of spinal segments may include alteration of neural activity is:

fixation hypothesis

48. There are ____ C.C.E accredited colleges in the US.

14

49. All matter has motion, therefore there is universal life in all matter.

True

50. Both organic and inorganic matter express innate intelligence.

False

51. The mission of innate intelligence is to maintain the material of the body of a living thing in active organization.

True

52. There is 100% of innate in every living thing, the requisite amount, proportional to its organization.

True

53. Universal intelligence adapts forces and matter for the body as long as it can do so without breaking a universal law.

False

54. The forces of innate intelligence may injure or destroy the tissue in which they work

false

55. The vertebral subluxation complex can cause spondylogenic symptoms due to clinical manifestation of the neurophysiological component.

True

56. One of the clinical signs of subluxation
muscle contraction or imbalances

57. The alternation of the normal dynamics, and physiological relationships of contiguous articulating structures is termed:

subluxation

58. When neural ~~dys~~function is stressful to the other body structures, and that this lower assistance can modify the nonspecific and specific coresponses, and alter the trophic function involved nerve it is called the :

neurodystrophic hypothesis

59. The neurocalometer is a device to measure:

temperature differences between two body

60. Vertebrae locked within their normal range of motion is referred to as the:

fixation concept

61. One of the historical leaders of the profession was known as the Barnum with Science:

B.J. Palmer

62. What hypothesis is defined as the chiropractic hypothesis that intervertebral subluxation can interfere with the normal transmission of nerve energy:

nerve compression

63. A refined tactile exploration with particular reference to the biomechanical action of joints, and any muscular abnormality is called:

palpation

64. The term "chiropractic" was coined by Rev. Samuel Weed from two Greek terms, cheir (hand) and praxis (practice):

True

65. The control of health care by the pharmaceutical and insurance industry in the early 1900's was one of the major obstacles that restricted chiropractor's early growth:

false

66. Universal intelligence would best be defined in chiropractic as:

the law or principle of organization

67. Innate intelligence would be associated with organization at the atomic level:

67. Innate Intelligence would be associated with organization at the atomic level: false

68. Understanding the significance of the imperceptible realm based on the truth of what is perceptible:
false

69. Underscores the importance of chiropractic care in the maintaining the well-being of the entire individual:
True

70. Inductive reasoning is different from deductive reasoning because inductive reasoning:
begins with particular and moves to general

71. Atomism/mechanism is a philosophical doctrine that:
true

72. Supports the empirical process of thought and perception
True

73. Life is basically explicable by laws of physics and chemistry
true

the major premise in chiropractic philosophy relates to the following concepts (74-78)

74. universal intelligence
true

75. priori statement
true

76. innate intelligence
false

77. Matter
true

78. Organization
true

Osteopathic's philosophy and principles during its initial development were based primarily on the following concepts

79. Effects of the spine on brain stem pressure
false

80. Innate intelligence
false

81. Abnormal spinal alignment and its effect on circulation or body fluids
true

82. A chiropractor's "adjusting technique determines the philosophical basis of their practice."
False

83. Faith is a viable form of perception that is equally applicable to intellectual concepts such as empiricism of rationalization.
True

84. B. J. Palmer taught that order and organization bespeaks intelligence at the cellular level only.
False

85. "Heart knowledge" is a term which philosophically denotes the "left lobe" or "nous" of the brain and the term "kardia" refers to "head knowledge" or the right lobe of the brain
false

86. Innate intelligence is related to intelligence at the cellular level and functions in accord with natural laws
true

87. "Deductive reasoning" best describes the basis of explaining chiropractic philosophy
true

88. The primary difference between empiricism and rationalization is that rationalization is based on strong

76. Innate intelligence

false

77. Matter

true

78. Organization

true

Osteopathic's philosophy and principles during its initial development were based primarily on the following concepts

79. Effects of the spine on brain stem pressure

false

80. Innate intelligence

false

81. Abnormal spinal alignment and its effect on circulation or body fluids

true

82. A chiropractor's "adjusting technique determines the philosophical basis of their practice.

False

83. Faith is a viable form of perception that is equally applicable to intellectual concepts such as empiricism or rationalization.

True

84. B. J. Palmer taught that order and organization bespeaks intelligence at the cellular level only.

False

85. "Heart knowledge" is a term which philosophically denotes the "left lobe" or "nous" of the brain and the term "kardia" refers to "head knowledge" or the right lobe of the brain

false

86. Innate intelligence is related to intelligence at the cellular level and functions in accord with natural laws

true

87. "Deductive reasoning" best describes the basis of explaining chiropractic philosophy

true

88. The primary difference between empiricism and rationalization is that rationalization is based on strong philosophical basis of our perception.

True

89. "Gnosis" is superior knowledge that is above mere assimilation of facts and refers to right brain knowledge.

False

90. Philosophy goes beyond observable facts and seeks the most fundamental questions underlying science itself. It deals with primarily with all except:

empiricism

91. D.D. Palmer is associated with all except:

developer of chiropractic

92. B. J Palmer taught that chiropractic's uniqueness was centered and based on the following concepts Except for:
disease is a condition that attacks the body from the environment
93. Chiropractic was defined by B.J. Palmer as "Philosophy, Science, and Art." "chiropractic philosophy" deals primarily with:
the application of the spinal adjustment and its effect on reducing the altered spinal mechanics
94. Life is the expression of innate intelligence through living matter.
True
95. Two factors which are of significance in studying the "signs of life" deal with:
selectivity and intelligence
96. The main "Principle" of chiropractic that demonstrated chiropractic's main objective as compared to the other healing arts, would best be described in:
the principle of the "Triune of life"
97. The link between innate intelligence and living matter:
~~the adaptability of the organism~~ *Perme*
98. The character of universal forces include all of the following except:
can be violated
99. The safety pin cycle is a simplistic explanation of the passage of mental impulses. The cycle can be limited by:
matter
100. Palmer's definition of subluxation addresses all of the following factors except:
abnormal disc and ligamentous tone
101. Power Plant Generator – Operator of Plant – Powerlines – Appliances
In the above what would be comparable to the "operator"
Innate intelligence
102. According to Palmer and Stephenson's definition of vertebral subluxation, could a vertebral subluxation occur in a corpse?
No
103. The "Axoplasmic Aberration" hypothesis states that compression of the vertebral arteries effects the plasma flow, which gives rise to altered cerebral blood supply.
False
104. The manifestation of universal intelligence in the human body is an expression of life in the human body.
False
105. The primary difference between empiricism and rationalization is that empiricism is based on deductive reasoning.
False
106. Faith is a viable form of perception that is very applicable to the vitalistic concepts of chiropractic philosophy and principles.
False
107. At times certain tissue of the body serve as "educated-body" and "innate body" when necessary educated body will always override innate body. FALSE

108. Chiropractic care should be always considered a therapeutic procedure for the start of disease rather than simply an approach toward the cause of disease or ill health.

False

109. Life is an expression of universal intelligence through universal matter.

False

110. "Limitation of matter" can have a negative effect on the normal expression of the safety pin cycle.

True

111. Educated intelligence is the intelligence used by educated brain and allows for functions such as will, memory, and reason.

True

112. Universal intelligence creates innate forces which are expressed as neural impulses.

False

113. The principle of "The Triune of Life": *the main cause for chiropractic*
defines the homeostasis that exists between atoms, energy, adaption.

114. B. J. Palmer is associated with all of the following except:

Harvey Lillard

115. "Dis-ease" is a term which would best be defined as:

a state in which the body is lacking in coordination, intercommunication, and proper function.

state of the body ... abnormal functioning.
